# Contents of Volume 62

**No. 1**

W. Kuijpers, E.L.G.M. Tonnaer, T.A. Peters and F.C.S. Ramaekers *(The Netherlands)*
Developmentally-regulated coexpression of vimentin and cytokeratins in the rat inner ear 1

M. Tachibana and H. Morioka *(Japan)*
Glucuronic acid-containing glycosaminoglycans occur in otoconia: Cytochemical evidence by hyaluronidase-gold labeling 11

S.E. Shore, D.A. Godfrey, R.H. Helfert, R.A. Altschuler and S.C. Bledsoe, Jr. *(USA)*
Connections between the cochlear nuclei in guinea pig 16

W.-y. Gao, D.-l. Ding, X.-y. Zheng, F.-m. Run and Y.-j. Liu *(People's Republic of China)*
A comparison of changes in the stereocilia between temporary and permanent hearing losses in acoustic trauma 27

D.B. McCreery, T.G.H. Yuen, W.F. Agnew and L.A. Bullara *(USA)*
Stimulation with chronically implanted microelectrodes in the cochlear nucleus of the cat: Histologic and physiologic effects 42

D. Lidan, S. Yedgar, H.B. Aronson and H. Sohmer *(Israel)*
Influence of experimentally elevated blood viscosity on the auditory nerve-brainstem evoked response and threshold 57

D. Ni, R.K. Shepherd, H.L. Seldon, S.-A. Xu, G.M. Clark and R.E. Millard *(Australia)*
Cochlear pathology following chronic electrical stimulation of the auditory nerve. I: Normal hearing kittens 63

M. Tachibana, E. Wilcox, N. Yokotani, M. Schneider and J. Fex *(USA)*
Selective amplification and partial sequencing of cDNAs encoding G protein $\alpha$ subunits from cochlear tissues 82

I. Melichar, A.H. Gitter, P.C. Dartsch and H.P. Zenner *(FRG)*
Characterization of marginal and Claudius' cells growing from cochlear explants in vitro 89

J.J.J. Dirckx and W.F.S. Decraemer *(Belgium)*
Area change and volume displacement of the human tympanic membrane under static pressure 99

M. Zacksenhouse, D.H. Johnson and C. Tsuchitani *(USA)*
Excitatory/inhibitory interaction in the LSO revealed by point process modeling 105

**Short Communication**

E.R. Wilcox and J. Fex *(USA)*
Construction of a cDNA library from microdissected guinea pig organ of Corti 124

S. Fujita, S. Inagaki, H. Takagi, T. Asao, J. Hozawa and S.-i. Usami *(Japan)*
Preprotachykinin A mRNA detected by in situ hybridization in guinea pig vestibular ganglion 127

Calendar of Events 130

**No. 2**

T.C. Chimento and C.E. Schreiner *(USA)*
Adaptation and recovery from adaptation of the auditory nerve neurophonic (ANN) using long duration tones 131

G. Rebillard and M. Lavigne-Rebillard *(France)*
Effect of reversible hypoxia on the compared time courses of endocochlear potential and $2f_1-f_2$ distortion products 142

P. Wangemann and D.C. Marcus *(USA)*
The membrane potential of vestibular dark cells is controlled by a large $Cl^-$ conductance 149

L.R. Bernstein and C. Trahiotis *(USA)*
Detection of antiphasic sinusoids added to the envelopes of high-frequency bands of noise 157

A.R. Cody *(Australia)*
Acoustic lesions in the mammalian cochlea: Implications for the spatial distribution of the 'active process' 166

F. Dodd and R.R. Capranica *(USA)*
A comparison of anesthetic agents and their effects on the response properties of the peripheral auditory system 173

T.A. Jones and R.C. Nelson *(USA)*
Recovery of vestibular function following hair cell destruction by streptomycin 181

Y.E. Cohen, C.K. Bacon and J.C. Saunders *(USA)*
Middle ear development III: Morphometric changes in the conducting apparatus of the Mongolian gerbil 187

L. Fredelius and J. Wersäll *(Sweden)*
Hair cell damage after continuous and interrupted pure tone overstimulation: A scanning electron microscopic study in the guinea pig 194

H. Ueda, T. Hattori, M. Sawaki, H. Niwa and N. Yanagita *(Japan)*
The effect of furosemide on evoked otoacoustic emissions in guinea pigs 199

R.S. Heffner and H.E. Heffner *(USA)*
Hearing and sound localization in blind mole rats (*Spalax ehrenbergi*) 206

F.A. Boettcher, V.P. Spongr and R.J. Salvi *(USA)*
Physiological and histological changes associated with the reduction in threshold shift during interrupted noise exposure 217

H. Sunose, K. Ikeda, Y. Saito, A. Nishiyama and T. Takasaka *(Japan)*
Membrane potential measurement in isolated outer hair cells of the guinea pig cochlea using conventional microelectrodes 237

**Short Communication**

R.L. Barretto and B.E. Pfingst *(USA)*
Electrical stimulation of the auditory nerve: Effects of pulse width on frequency discrimination 245

*Calender of Events* 250

*Contents of Volume 62* 251

*Author Index* 253

*Subject Index* 255
